“The important thing is not to
stop questioning.” Albert Einstein

Communication Corner
by Mrs. Person, MA, CCC-SLP

Last week, 5 tips were being offered to improve language skills. The tips can be carried out easily at home during normal routines. These are the following 5 tips to help you with your children’s skills.

- 6. Teach your child how to use the telephone (remembering telephone numbers, dialing, proper greetings, etc.)
- 7. Let your child help you with the planning of family activities (vacations, holiday dinners, birthday parties).
- 8. Read signs when you are out on walks or drives.
- 9. Reinforce all the concepts that your child’s teacher is working on. If you need ideas, please ask!
- 10. Do not allow the over usage of the words “thing”, “stuff”, “the man”, “the lady”, “the place.”, etc. Teach and encourage your child to use the correct labels; the table, the marbles, the cashier, the zookeeper, the airport, the grocery store, etc.

These are all simple lessons that will truly improve your child’s language skills!

LOOKING AHEAD
